PRACTICAL TOOLS FOR QUICK DATA VISUALIZATION IN R

Apply by 11th January 2023

This crash course was born to spread the word on the existence of R packages that offer great functions to quickly explore, present, and communicate our results. During the sessions, we will use data visualization to try to answer questions and create new hypotheses by exploring the sample datasets and your own.

Teacher: Miquel Anglada Giroto

Date: 17th & 18th January 2023 / 10:00-12:00

Location: Bioinformatics room (PRBB patio)

Level: Intermediate - Basic knowledge of R required

Basic Software: RStudio

Maximum n° students: 18

Topics covered: Data visualization with R
